

# Mr. James T. Blue

## CASE STUDY: Determining Level of Care Using MDS-HC

### Background Information:

Mr. Blue is a young, 28 year old man with a primary diagnosis of HIV infection. Mr. Blue was linked to your Support Coordination agency one week ago, and you performed the MDS-HC assessment yesterday. You have entered his MDS-HC assessment in TeleSys, and are now in the process of determining if Mr. Blue meets Nursing Facility Level of Care for eligibility in the Elderly Disabled Adult (EDA) Waiver.

### Your team's assignment:

- Review Mr. Blue's MDS-HC assessment and determine if he meets/does not meet Nursing Facility Level of Care;
- In addition, your team is to write down the steps you followed in making your final determination regarding LOC;
- Based on your findings, list the next steps you will take in processing Mr. Blue's case;
- Be prepared to report on your findings.
