“When health is absent,
Wisdom cannot reveal itself,
Art cannot manifest,
Strength cannot fight,
Wealth becomes useless, and
Intelligence cannot be applied”

Herophilus, Physician to Alexander the Great, Circa 300 B.C.
## Estimated Population, 2003

### Louisiana and Bienville Parish

This section offers an initial list of resources to obtain further information on the topics addressed in this publication. The list has been organized into national, state, local, and other sources. The national sources have been sub-grouped by subject consistent with order of chapters presented in the Profiles.

This list should be used as a place to start gathering more information. In the process, you will discover links to many more resources. You and your community will have begun the journey towards self-improvement and the betterment of all humanity, simply by acquiring more knowledge.

Louisiana DHH/Office of Public Health Program Offices

Adolescent School Health 504-568-5330
- Operates 54 school-based health centers around the state of Louisiana. These centers help to meet the physical and emotional health needs of students and their families in an affordable and accessible manner. The Office of Public Health also assists in the coordination of Comprehensive School Health Education.
- Provides current and comprehensive data, information and resources to facilitate collaborative and community-based adolescent health activities.

Center for Health Statistics 504-568-2417
- Provides state health status indicators and analyses for use in health program planning and evaluation, monitoring health problems that may occur in Louisiana, supporting health research data projects in conjunction with universities, private and other public agencies; Officially called the Louisiana State Center for Health Statistics.

Commercial Seafood Sanitation 225-763-5553
- Prevents seafood-borne disease outbreaks and insures that all distributed shellfish and commercially processed seafood are in compliance with the State Food, Drug, and Cosmetic Law, State Sanitary Code and the National Shellfish Sanitation Program.

Beach Monitoring Program 225-763-3549
- The Louisiana Beach Monitoring Program monitors water quality on a weekly basis from May 1 to October 31.

Commodity Supplemental Food Program 504-568-5065
- Provides a monthly nutritious food package to low income seniors aged sixty and older, pregnant and postpartum women and infants and children up to the age of six.

Buildings and Premises Inspection 225-763-5555
- Through inspections and technical assistance, assures a safe and healthy environment in buildings where the public visits or congregates (schools and child care centers, and in facilities where persons are confined such as hospitals, nursing homes, group homes and prisons).

Community Sewerage Program 225-765-5061
- Monitors and regulates sewerage treatment and sanitary sewage disposal by community systems to protect the public from wastewater-borne disease outbreaks, from sewerage treatment systems, whether privately or publicly owned, serving two or more individuals.

Childhood Lead Poisoning Prevention Program (LACLPPP) 504-568-5070
- The Louisiana Childhood Lead Poisoning Prevention Program (LACLPPP) identifies high-risk areas and target efforts and resources to reduce the number of children with elevated blood lead levels in Louisiana.

Children’s Special Health Services 504-568-5055
- Plans, coordinates, improves and administers specialized medical care programs for eligible children with severe/chronic medical illnesses or disabilities.

Community Health Promotion & Chronic Disease 504-568-7210
- Promotes adherence to a risk-reducing life-style, thereby decreasing the prevalence of chronic conditions in the population. Includes Asthma, Chronic Disease Epidemiology, Diabetes Control, Heart Disease and Stroke Prevention, Obesity, and Tobacco Control Programs.
Disease Vector Control Program  
225-763-5555  
- Prevents and controls the transmission of insect- or rodent-borne diseases such as yellow fever, malaria, dengue fever, encephalitis (all carried by mosquitoes) and plague and typhus (carried by fleas).

Drinking Water Revolving Loan Fund  
225-765-5075  
- Provides assistance, in the form of low-interest loans and technical assistance, to public water systems in Louisiana to assist them in complying with state and federal drinking water regulations ensuring that their customers are provided with safe drinking water thereby protecting the public health.  
- Ensures, through assessment and assistance, (Capacity Development Program) that public water systems have the technical, managerial, and financial capacity to properly operate and provide safe drinking water to the public.

EarlySteps  
504-599-1072  
- EarlySteps is Louisiana’s Early Intervention System for children with disabilities and developmental delays ages birth to three and their families.

Emergency Medical Services  
225-763-5700  
- Provides Emergency Medical Technician training programs that meet the requirements of the National Registry of EMTs and provides the National Registry of EMTs written and practical examinations.

Environmental Epidemiology & Toxicology  
504-568-8537  
- Identifies and evaluates the effects that toxic chemicals have on the public’s health. Makes recommendations to prevent or reduce illnesses that may be caused by exposure to those chemicals and promote a better public understanding of the health effects of chemicals in the environment.

Family Planning  
504-568-5330  
- Provides health education to women and health care to child-bearing-age women in order to reduce female and infant morbidity and mortality and in order to allow individuals and families to plan family size and spacing of pregnancies.

Food and Drug Control  
225-763-5485  
- Protects the health and welfare of consumers by assuring that foods, drugs, cosmetics and prophylactic devices manufactured, processed, packed or sold in Louisiana are pure, safe, wholesome and perform as they are labeled or advertised.

Genetic Diseases  
504-568-5070  
- Provides screening, diagnosis, counseling and educational services to individuals with genetic disorders, their families and the general public.

HIV/AIDS  
504-568-7524  
- Provides for surveillance of HIV infection and AIDS cases, with bimonthly and annual reports.  
- Prevents the spread of HIV through various services in high risk areas, including targeted HIV/STD prevention education, HIV counseling and testing in parish health units, peer youth and prison programs and one-on-one street outreach in communities with high rates of sexually transmitted diseases.  
- Provides HIV infected clients with home health and hospice, medications, transportation, emergency assistance funds and housing.

Immunization  
504-483-1900  
- Provides leadership, vaccines and supplies to give a full range of immunizations to at least 95 percent of the state’s children by the time they enter kindergarten and to give the full range of immunizations to 90 percent of the state’s children by the age of two.
**Infectious Disease Epidemiology**  
504-568-5005  
- Offers a computerized surveillance system to document cases of communicable diseases and to identify disease trends and risk groups. The program also conducts investigations of disease outbreaks, conducts rabies surveillance and evaluates transmission potential; provides consultation and technical assistance to private and public health care professionals; provides educational in-service programs to a variety of health professionals; and publishes timely information to physicians on communicable diseases.

**Laboratory Services**  
504-568-5375  
- Laboratory analyses combine screening, prevention, diagnosis and treatment for patients in programs where health services are delivered directly to the client and for monitoring and data collection where epidemiology is the focus. Laboratory analyses also combine inspection and correction of conditions that may cause disease or disorder to Louisiana citizens or to those who buy goods produced in the state.

**Molluscan Shellfish Program**  
225-763-3571  
- Prevents infectious disease by providing health certification that shellfish-growing waters do not contain contamination or pollution hazardous to public health.

**Infectious Waste Control**  
225-765-5555  
- Protects health by regulating the packaging, transportation and treatment of potentially infectious biomedical waste by health care facilities, commercial transport, storage and treatment facilities and private citizens.

**Maternal and Child Health**  
504-568-5073  
- Provides education, counseling, screening, treatment and follow-up to ensure the physical and dental health of infants, children and pregnant women in this state.  
- MCH epidemiological studies in the state.  
- Provides objective data for policy-building process and other specific projects.  
- Analyzes data from different data sources such as vital records, the Pregnancy Risk Assessment Monitoring System (PRAMS), and other program data.

**Nutrition Services**  
504-568-5065  
- Provides community nutrition outreach programs and health fairs.  
- Provides technical support and training for healthcare professionals.  
- Provides training and professional guidance for public health interns and students in graduate, post-graduate and medical programs.  
- Provides nutrition screening, assessment and counseling.  
- Certified Child Care Consultants

**Injury Research and Prevention**  
504-568-2509  
- Serves as an information and technical assistance resource for injury prevention efforts in Louisiana and conducts surveillance of targeted injuries.

**Milk and Dairy Control**  
225-765-5599  
- Assures safe, wholesome milk and milk products for public consumption and works to maintain a zero level of milk-borne disease in the state. Certifies all dairy farms and processing plants supplying milk for government contracts and interstate commerce.

**Nursing Services**  
504-568-5142  
- Assesses, evaluates, counsels, and educates clients on chronic disease reduction (heart disease, diabetes, strokes, and chronic respiratory conditions).  
- Provides child health services including physical assessments, developmental evaluations, health risk assessments, immunizations, and nutritional guidance.  
- Provides early screening and detection of cervical and breast cancer.
Onsite Wastewater Program  
225-763-5550  
- Monitors, regulates and issues permits for individual sewerage systems to protect the public from wastewater-borne disease, from sewerage treatment systems served by a single dwelling, office building or institution, exclusive of industrial wastes.

Operator Certification Program for Water and Wastewater Operators  
225-705-5058  
- Provides licenses for Water and Wastewater Operators of systems that serve populations over 500 and coordinates training programs with other training organizations.

Pharmacy Services  
504-568-5022  
- Provides the medication requirements for the Family Planning Program, including contraceptive devices and medications for the STD, Tuberculosis, Children’s Special Health Services and Hemophilia Programs.

Public Health Emergency & Response  
225-763-3581  
- The Office of Public Health works with other state agencies to deal with natural and man-made disasters located within or near the borders of Louisiana. Offers updated information as received by the Emergency Operating Center (EOC) and provides and receives technical advice.

Public Health Social Services  
504-568-2951  
- Provides psychosocial services for children, families and adults, directly or via referral within the community service network. Services are routinely available in the Children’s Special Health Services Program and by referrals in other programs of the OPH.

Retail Food Inspection  
225-763-3590  
- Prevents or minimizes the occurrence of food-borne disease outbreaks through comprehensive programs of consulting.

Safe Drinking Water  
225-765-5038  
- Assures the proper design, construction, operation and quality of public water supplies and provides technical assistance to persons with individual water systems.

Sexually Transmitted Diseases  
504-568-5275  
- Provides surveillance and control of sexually transmitted diseases by identifying infected individuals and providing treatment.

Tuberculosis Control  
504-568-5015  
- Provides surveillance for active tuberculosis cases; tracking, testing and medical evaluation of contacts to active cases; outbreak evaluations and control, and provides professional community education.

Vital Records  
504-568-5152  
- Responds to statutory mandates related to the collection, maintenance, certification, sale and preservation of birth, death, marriage and other vital records.

WIC Services (Supplemental Program for Women, Infants and Children)  
504-568-5065  
- When medically necessary, WIC provides a nutritious food package and nutrition counseling to low income infants and children up to the age of five, as well as pregnant, postpartum and breastfeeding women at nutritional risk. WIC also provides:  
- Breastfeeding guidance;  
- Breast pump loan program;  
- Nutrition activities and group classes;  
- Cooking demonstrations and recipes; and  
- Nutrition screening, assessment and counseling.
Parish Health Profile Glossary

**ATOD:** Term used in the Communities That Care Survey to mean “alcohol, tobacco and other drugs”.

**Access:** Freedom or ability to obtain or make use of as in the case of health care.

**Accident:** An unintentional injury.

**Acquired Immune Deficiency Syndrome (AIDS):** An infection that greatly diminishes the cell-mediated immune system, usually caused by the human immunodeficiency virus, (HIV).

**Actual causes of death:** The behavior that contributes to the leading causes of death.

**Adequate Prenatal care:** As measured by The Modified Kessner Index, meaning that the first prenatal visit was in the first three months of the pregnancy and that the number of prenatal visits was appropriate to the gestational age of the baby at birth.

**Advocacy:** The promotion of policies, regulations and programs to improve health by mobilizing public sentiment to pressure systems.

**Age-adjusted death rate:** A rate calculated to adjust for differences in the distribution of ages in separate populations. The distribution of ages in a population can increase or decrease the likelihood of death in that population. When comparing mortality data from different populations, rates adjusted for differences in age distribution are used because age is the most significant characteristic related to disease and death.

**Anemia:** A condition in which the blood is deficient in red blood cells, in hemoglobin, or in total volume. Iron deficiency is the most common known form of nutritional deficiency.

**Assistive technology:** Technology that is used to increase the communication or mobility of persons with disabilities.

**At risk for overweight children:** Children who are in the 85th to 94th percentile of the gender-specific Body Mass Index BMI for age-growth charts.

**Body Mass Index (BMI):** A measure of the relative weight of an individual using a mathematical formula that takes into account both a person's height and weight.

**Baseline:** The starting point for a comparison, usually taken before an intervention.

**Behavioral Risk Factor Social Survey (BRFSS):** An anonymous national survey conducted by telephone interview that asks about behaviors and behavioral determinants.

**Benchmark:** The measurement against which you will compare all others.

**Bipolar:** formerly known as manic-depression, is a disorder of the brain resulting in episodes of mania and depression.
**Birth defect:** An abnormality in structure, function or body metabolism that is present at birth.

**Birth rate (crude birth rate):** A measure of the number of live births in a population during a given period of time.

**Birthweight:** The first weight of a newborn obtained after birth. Low birthweight is defined as less than 2,500 grams (5 pounds 8 ounces or 5.5 lbs.). Very low birthrate is defined as less than 1,500 grams (3 pounds 5 ounces or 3.3 lbs.). The percent of low and very low birthweight is the number of these births in a population during a given time interval, divided by the total number of live births reported in that population during the same time interval. Very low birthweight infants are at greater risk of mortality and long-term disability than higher weight infants.

**Bio-terrorism:** Destruction, or the threat of destruction, through the use of biological agents by states, groups, or individuals in order to intimidate or to coerce governments or civilians.

**Blood borne diseases:** Disease that are passed through blood, including syphilis, hepatitis B, hepatitis C and HIV/AIDS.

**Brownfields:** Abandoned, idle, or underused industrial or commercial sites where expansion or redevelopment is complicated by real or potential environmental contamination perceived by the community.

**Cancer:** A term for diseases in which abnormal cells divide without control. Cancer cells can invade nearby tissue and can spread through the bloodstream and lymphatic system to other parts of the body.

**Case:** In medical terms, it is a person with an illness or related health event, i.e., injury. In studies, cases are the subjects, persons or things, from which data are collected. A case is the smallest unit of analysis.

**Carcinogen:** A substance or agent that is known to cause cancer.

**Cerebrovascular disease:** A disease of or involving the cerebrum (brain) and the blood vessels supplying it.

**Child Abuse:** The non-accidental, physical or mental injury to a child by the child’s caretaker.

**Coastal beach advisories:** Recommendations for specific coastal marine beaches based on levels of indicator bacteria (i.e. fecal coliforms and enterococci). Advisories remain in effect until bacteria levels at the sampling locations meet bacteriological water quality criteria.

**Colorectal Cancer:** Cancer of the colon and rectum.

**Community:** A specific group of people, often living in a defined geographical area, who share a common culture, values, and norms and are arranged in a social structure according to relationships developed over a period of time.
**Community capacity**: Characteristics of communities that affect their ability to identify, mobilize, and address social and public health problems.

**Community policing**: Policing which combines the resources of the police, the local government and the community for community-based problem solving.

**Communities That Care (CTC) Survey**: Survey of youth in grades 6, 8, 10 and 12 conducted every other year by The Louisiana Department of Health and Hospitals, Office of Addictive Disorders and the Department of Education.

**Contraception (birth control)**: the means of pregnancy prevention. Contraceptive methods include permanent methods (i.e. male and female sterilization) and temporary methods (i.e. barrier, hormonal and behavioral).

**Cyber crimes**: Specific crimes dealing with computers and networks (such as hacking) and the facilitation of traditional crime through the use of computers (child pornography, hate crimes, telemarketing /Internet fraud).

**Data**: Actual numbers, rankings, sequences and values that describe something specific, most often considered to be numerical or quantitative although transcripts and videotapes are also considered data in qualitative research.

**Data base**: Data organized for rapid retrieval and analysis, a consolidation of many records of single datum.

**Data point**: A single piece of data.

**Depression**: A cognitive and emotional disorder causing thoughts of deprivation, frustration, rejection, humiliation or punishment.

**Developmental disability**: A disability that occurs prior to age 22; is likely to continue indefinitely; and results in substantial limitations in three or more areas of major life activities, such as self-care, language, learning, mobility, self-direction, and capacity for independent living.

**Disability**: A “condition” usually sensory, physical or mental that limits daily living or the independence of the individual.

**Disparities**: Refers to markedly distinct differences in quality or character, in this context, of health care.

**Domestic/Family Violence**: Any assault, battery or other physical, mental or emotional abuse that occurs between family or household members who live together or who previously lived together.

**Drug Courts**: A component of the judicial system wherein judges take an active and supervisory role in overseeing treatment, providing educational services, awarding incentives and imposing sanctions on individuals with drug and alcohol addictions in lieu of incarceration.
Early Prenatal Care: Care received in the first trimester of pregnancy.

Emerging pathogen: An illness-causing microorganism previously unknown to be a human pathogen; a foodborne pathogen not expected to occur in particular foods; or a pathogen that is dramatically increasing in prevalence.

Environment: The surroundings, the setting, the location in which an individual lives, works and/or plays.

Environmental factor: Factor in the air, water, soil or social context that is preventable and that has an affect on a health event.

Epidemiology: The study of distribution and determinants of health-related status or events and the application of this study to control of health problems.

Essential public health services: The public health services described in the Public Health in America (a collaborative statement defining public health vision, mission and essential services) statement: monitoring health status; diagnosing and investigating health problems; informing; educating and empowering people; mobilizing community partnerships; developing policies and plans; enforcing laws and regulations; linking people to needed services; conducting evaluations; and conducting research.

Equity: Freedom from bias or favoritism as in the case of obtaining health care.

Fish advisories: Recommendations to limit consumption of certain species of fish taken from waters where chemical contaminants are present.

Five-A-Day program: Daily intake of five servings from plant sources. The five servings and vegetables should be three vegetables and two fruits daily.

Food-borne illness and food-borne disease: Broad terms that encompass infection and intoxication caused by microbial or chemical contaminants in foods. Some food-borne illnesses are from a one-time intake of a sufficient number of microorganisms or toxin to cause illness. Other food-borne illnesses are the result of the intake of compounds over long periods of time.

Food-borne disease outbreak: The occurrence of two or more cases of a similar illness resulting from the ingestion of a common food.

Fluoridated Water: Water systems that have either adjusted fluoride levels to the optimal level or where fluoridation has occurred naturally.

Genetic disorders: The group of health conditions that result from genes passed to the embryo from the parents.

Geographical Information System (GIS): A computer application for mapping and analyzing geographic data to better understand data relationships and trends.

HIV: Human immunodeficiency virus that causes AIDS.
**Hazardous wastes**: Solid, liquid, or gas wastes that can cause death, illness, or injury to people or destruction of the environment if improperly treated, stored, transported, or discarded.

**Healthy community**: A community that is continuously creating and improving those physical and social environments and expanding those community resources that enable people to mutually support each other in performing all the functions of life and in developing to their maximum potential.

**Health improvement plan**: A series of timely and meaningful action steps that define and direct the distribution of the essential public health services in a specific state or community according to the gaps identified in the needs assessment.

**Healthy People 2010**: A comprehensive set of disease prevention and health promotion objectives for the nation to achieve over the first decade of the new century. Created by scientists both inside and outside of government, it identifies a wide range of public health priorities and specific, measurable objectives.

**Hygiene**: Any of a number of actions, conditions, or practices (as of cleanliness) conducive to health and sanitation.

**ICD-9 Codes**: A classification of diseases that categorizes morbidity and mortality based on information obtained from medical reports and vital statistics documents.

**Immunization**: The vehicle for vaccines to inoculate populations.

**Incarcerate**: To put in jail or imprison.

**Incidence**: Number of NEW cases of a disease occurring in the population during a specified period of time. The rate describes the extent that people within a population who do not have a disease develop the disease during a specific time period.

**Index**: A group of measurements that collectively represent a phenomenon or issue.

**Indicator**: A numerical, ordinal, or data representation of information that measures the status of a thing or process over time.

**Indoor Air Quality (IAQ)**: A term that refers to air within homes and other buildings. Chemicals can become trapped indoors and result in elevated levels inside buildings affecting the IAQ.

**Injury**: Intentional or unintentional damage to the body. Injuries are understandable, predictable and preventable.

**Intended pregnancy**: A general term that includes pregnancies that the woman says was wanted at the time of conception, irrespective of contraception use.

**Key indicator**: An indicator that has particular significance in a population or for a particular subject, sometimes called the leading indicator.
Keywords: Specific words used in web based research/searches to help the researcher locate the exact sites, data and/or information.

Leading causes of death: A statistical representation of the most common causes of death reported on death certificates.

Mammogram: An x-ray of the breast which screens for unusual growths.

Mean: A measure of central tendency, the arithmetic average, calculated by adding up all the observed values and dividing them by the sample size of the group.

Mode: A measure of central tendency, the value that is most often reported in a sample.

Median: A measure of central tendency, the 50th percentile value or the value at which 50 percent of all values fall above or below.

Medicaid: Jointly (state and federally) funded primary source of preventive health care for medically vulnerable populations such as, low income families, low-income seniors, and disabled people covering a wide range of services including physician, hospital, laboratory, x-ray, and nursing home services. Optional programs cover services such as pharmacy and intermediate care facilities for the mentally retarded.

Medicare: Federally funded health insurance program for all people 65 years and older and some younger people in special circumstances. Medicare is a traditional fee-for-service system that covers health care needs. Medicare Part A is inpatient hospital insurance, skilled nursing facility services, home health services, and hospice care. Medicare Part B is supplementary medical insurance. Medicare pays the balance of health care costs after clients pay premiums and deductibles.

Microbial: Bacteria, viruses or other microbes.

Morbidity: The relative incidence of disease.

Mortality: The quality or state of being dead.

NCHS list of 72 leading causes of death: Extrapolated from the coding system of diseases, ICD-9 codes. On a national level, it is the 72 most common causes of death.

Needs assessment: A formal process used to identify problems and assess the capacity to address health and social service needs. The needs assessment will identify which populations, if any, are underserved by the providers in that community and it will provide information about resource distribution.

Neglect (in reference to child abuse and neglect): Refers to the caretaker’s failure to provide for the child’s basic physical, medical, and/or emotional needs.

Obesity: An excess of body fat defined by an individuals BMI.
**Oral Health:** The health of teeth and gums. Good oral health habits include good diets, tooth brushing, flossing, and regular check-ups.

**Overweight children:** Children who are at or above the 95th percentile of the gender-specific Body Mass Index (BMI) for age-growth charts.

**Ozone:** Air pollutant linked to industrial and transportation sources. Ozone is the main ingredient in urban smog and leads to shortness of breath, wheezing, coughing, headaches, nausea, and eye and throat irritation.

**Pap test (or smear):** Microscopic examination of cells collected from the cervix, used to detect changes that may be cancer, inflammation, or infection.

**Pathogen:** A microorganism that causes illness.

**Per capita:** Per person.

**Pesticides:** Chemicals developed to repel, control, or kill pests such as insects, weeds, fungi, or rodents.

**Physical Activity:** Moderate activity occurring in segments at least ten minutes long, and add up to at least 30 minutes a day, five or more days per week.

**Population at risk:** The total number of persons who are at risk for the disease or people who are cases and people who could become cases.

**Poverty Level:** A set of money income thresholds that vary by family size and composition. Incomes below the appropriate thresholds are considered below the poverty level. Thresholds are updated annually by the U.S. Census Bureau.

**Premature birth:** A live birth that occurs prior to 37 weeks pregnancy.

**Prenatal care:** Health care, counseling and related services provided during pregnancy to assure the best possible health for both mother and child. Care should start in the first trimester and continue throughout pregnancy. One major focus of such care is screening/monitoring to identify conditions that might threaten the mother or the child. A second major focus is counseling and guidance relative to diet, alcohol, tobacco and other health concerns. Other services, for those who qualify, are social and financial counseling, WIC, and Medicaid.

**Prevalence:** The number of people in a population who have a certain disease, disorder or condition at any given time.

**Preventable injury:** Unintentional or intentional damage to the body that could have been prevented, including homicide and suicide.

**Primary data:** Data that are collected for the specific purpose of the research at hand.

**Primary prevention:** Halting the occurrence of a disease before it happens.
**Proportion:** Ratio in which the numerator is a subset for the denominator.

**Protective Factors:** Term used in the CTC Survey to define attitudes and influences that have been shown to help youth resiliency to youth behavior problems.

**Quality of Life (QOL):** A representation of the qualitative level of a person’s life. There are many QOL indexes.

**Rate:** A measure of some event, disease, or condition in relation to a unit of population, along with some specification of time. Rates allow comparisons between different populations or one population at two different times.

**Ratio:** One number divided by another.

**Risk factor:** Something that increases a person’s chance of developing a condition. An underlying factor that is preventable and which leads to, or increases, the risk of an adverse health event. It is a characteristic that has been demonstrated statistically to be associated with a particular injury. Term used in the CTC Survey to define attitudes and influences that have been shown to be detrimental to youth resiliency to youth behavior problems.

**Schizophrenia:** A biologically-based brain disorder characterized by loss of connection to reality and associated with affective, behavioral, and intellectual disturbances.

**Screening:** Checking for a disease when there are no symptoms.

**Sealant:** A plastic coating applied to the chewing surface of the teeth, primarily to protect the surface molars from collecting food, bacteria or debris that would promote dental decay development.

**Secondary data:** Data that are collected by others or already exists that is used by a researcher.

**Secondary prevention:** Screenings and tests to identify the pathogenic states of people in order to prevent disease progression.

**Serious mental illness:** A diagnosable mental, behavioral, or emotional disorder that meets criteria of the Diagnosis and Statistical Manual of Mental Disorders (DSM-IV – American Psychiatric Association, 1994) and results in functional impairment substantially interfering with or limiting one or more major life activities, including schizophrenia and psychotic disorder, major depression, and bipolar disorder.

**Sexually transmitted diseases (STDs):** Diseases that are transmitted through sexual contact; Chlamydia, syphilis, and gonorrhea for example.

**Stakeholder:** A person or organization that has a reason to be interested in the results of planning.

**Superfund sites:** Environmental contamination sites that qualify for federal cleanup money.
Swimming advisories: Recommendations for specific bodies of water that are not safe to swim or recreate in due to contaminants or pollution, usually coliform contamination or in some incidences, chemical contamination of water or sediments.

Target population: The groups of persons (usually those at high risk) who program intervention are designed to reach.

Total Crime Index: FBI data base, combination of the arrests for violent crime and for property crime.

Trend: The value of a measured indicator over time.

Underlying cause of death: The disease or injury that initiated the sequence of events leading to death. An example of an underlying cause of death due to lung cancer is smoking tobacco.

Underweight Children: Children who are below the 5th percentile of the gender-specific Body Mass Index BMI for-age growth charts.

Unintended pregnancy: A general term that includes pregnancies that a woman states were mistimed or unwanted at the time of conception (not at the time of birth), irrespective of contraception use.

Unintentional injury: A type of injury that occurs without purposeful intent.

Vaccines: Biological substances that interact with the immune system and usually produce an immune response that is identical to that produced by the natural infection (not subjecting a person to full-blown disease or complications).

Validity: The ability of an indicator or a variable to measure what one intended to measure. The example of a valid indicator is cigarette sales as a measure of tobacco consumption. When people buy cigarettes they are likely to use them. An indicator that is not valid would be reporting tobacco usage when interviewing young teens while their parents were present.

Vector: Living, nonhuman hosts to a disease-causing pathogen including insects, like a fly or mosquito, or a small animal like a mouse or rat that transport, carry or serve the process of the disease.

Work-related injury: Any injury incurred by a worker while on or off employer premises but engaged in work-related activities.

Youth Risk Behavioral Survey (YRBS): a national survey conducted by phone interview that asks about behaviors and behavioral determinants.
