

CHILDREN AND ADOLESCENT ACCESS TO PRIMARY CARE PRACTITIONERS (AGES 12 - 19 YEARS)

The measure includes children who were at least 12 years but not over 19 years old, who were continuously enrolled in Louisiana Medicaid during the measurement year. The rate (percentage) shows how many of these children had at least one ambulatory or preventive care visit during that year.*

*Rates shown are for Medicaid-only recipients (dual-eligible recipients are excluded)
