

Multi-Drug Resistant Organisms (MDRO) Management in Long Term Care (LTC) Facilities Workshop

Sponsored by Louisiana Department of Health
Office of Public Health - Infectious Disease Epidemiology Section

The Infectious Disease Epidemiology Section will hold three one-day workshops in the following cities in Louisiana: Metairie, Lafayette and Ruston. This education is targeted towards infectious disease preventionists employed by long term care facilities, acute care hospitals, and other healthcare settings throughout the state, as well as infectious disease personnel who have roles in infection surveillance and reporting. Preventing infections will reduce the burden of MDROs in healthcare settings. The training is free of charge but must be registered for because of seating limitations and to provide the adequate number of handouts.

<u>Time</u>	<u>Activity</u>	<u>Presenter</u>
9:15 a.m.	Registration, Welcome and Introductions	Dr. Raoult Ratard
9:30 a.m.	Baseline Survey	Erica Washington
