

Ebola Facts

What you need to know about Ebola.

While Ebola poses no significant risk to the United States, Louisiana is prepared.

There are no known cases of Ebola in Louisiana. However, were a case to develop in our state, Louisiana is prepared. The Louisiana Department of Health and Hospitals is committed to ensuring that our health care system and our emergency responders are ready. To read more about what DHH is doing to maintain readiness in our state, visit www.DHH.la.gov/ebola.

Key Facts:

Contracting Ebola in the United States is highly unlikely. One can only get Ebola from:

- ▶ touching the bodily fluids of a person or animal who is sick with or has died from Ebola, or
- ▶ touching objects contaminated with those bodily fluids.

It is always important to follow guidance from the CDC when traveling to another country. Visit www.cdc.gov/travel before you travel.

You can't get Ebola through air

You can't get Ebola through water

You can't get Ebola through food
